Hi Linda,

FYI, I've been asked to give my AAPCO Spanish labeling presentation to Region 6 states. I agreed and will present remotely on April 29.

Jose

This is great news!! Thank you. I would like you on Wednesday the 29th. Since there is a one hour time change between us, how about 9:20 am Central Time on April 29th? I will block off 30 minutes for you. Will that be enough? As far as fumigants go, Methyl Bromide and Vikane (structural) are the two that first come to mind. Soil fumigation is not a big use in Texas, but it is good to keep up with what is happening as we do have some conducted and I don't know the status of the other states. I think the presentation that you gave for AAPCO covers the topic pretty well especially when you explain the background and goals.

Let me know if that time and date works for you and thank you again!

Ms. Fults,

Yes, I'd be happy to participate. I'm available both dates, so please let me know. The 29th is better for me, but I can probably make time on the 30th if necessary.

Was the information presented at AAPCO sufficient for what you would need, or should I include any other information?

Also, I'll discuss with my fumigant colleagues to see if there are any updates.

What types of fumigants are of interest to region 6? Please let me know if there are any specific fumigant active ingredients, soil or structural, that are commonly used in the region.

Thanks!

Jose

Mr. Gayoso,

I attended the AAPCO meeting earlier this month and thought that your information on the pilot program of Spanish/English labeling might be a topic of interest at our EPA Region 6 meeting of states and tribes that will be held on April 29 and 30th.

I would like to know if you would be available by phone to give your presentation to this group of state lead agency and tribe pesticide management and staff. You could send your powerpoint to me ahead of time and we could show it to the group.

At this point in time we have many times available on either the full day on the 29th or the morning of the 30th.

Also, if there is anything new and important for the states to know of soil fumigants, now would be a good time to share that information as well.

Thank you for considering this request and I look forward to working with you to share

your information.
